

MaxSD Pro

PN: PG 0002

High density polyethylene underlay with integrated PE vapor barrier and increased impact sound reduction, suitable for floor heating.

Product highlights

- Closed cells HDPE foam used for installation of laminated and engineered floating floors.
- Suitable for floor heating - exceeds thermal conductivity recommended by EPLF.
- Integrated vapor barrier with overlap and tape for fast installation.
- Improved impact sound reduction for better privacy protection.
- For high demands on pressure stability under heavy loaded floors.
- Can be laid easily and quickly, since it is always flat and has a slippery surface.
- Very high material density.
- 100 % recyclable, CFC and HCFC free.
- Ecologically friendly.

General information

All data are based on our experience and careful investigations. The diversity of the materials used, as well as the different construction site and processing conditions, can not be examined or influenced by us in detail. The quality and function therefore depends on the expert site evaluation and product use. In case of doubt, carry out your own tests or seek advice on our application technology. When processing, please observe the rules of technology as well as the manufacturing specifications of the building materials involved and constantly changing state of technology.

Storage

Approx. 1 year, protecting from direct sunlight or other weather influences.

Application

Unroll underlayment over subfloor with vapor barrier layer facing up and individual rows butting to one another and seal the joints with aluminum sealing tape or using integrated overlapping and tape (if applicable).
